¹The program uses State Median Income (SMI) to determine copay categories and income limits. The \$215 copay level is reserved for reapplications only; new applications with income over 60% SMI would be considered over income and denied.

²The income limit column is not used to determine eligibility at application; it is used to determine the point at which a consumer's income would warrant case termination during their eligibility period.

Effective 10/01/2023
